IT you want...

eMerge Solutions is a 'one of a kind' software company in Sri Lanka. Our core competency is providing software "tailor-made" to our customer needs. Unlike many, the programming languages we use are selected carefully to accommodate future expansions and innovations in technology. This probably is the reason for our loyal customer base.

Our key achievement is the Sales Force Automation software which uses the latest technology and is presently used by several companies in Pharmaceuticals and FMCG.

One of our landmark projects is the bar-coding & procedure tracking of the In-Vitro Fertility section of Lanka Hospitals, which we developed three years ago and according to them, it is the first in South Asia.

Our quality of service has enabled us to reach multinational as well as many local companies.

Group Companies

SMM Halcyon (Pvt) Ltd

A pharmaceutical company distributing to the entire island possessing a very well diversified distributor network and inclusive of a fully integrated software network. Established with commitment to its partners, ethical environment and Human Resource development.

SMM Halcyon (Pvt) Ltd.

A company which provides nature's goodness for therapeutic needs in the forms of capsules, syrups and tablets of pharmaceutical grade, made out of herbs.

Eco Minds (Pvt) Ltd.

Company Overview...

We are a very committed, dedicated team of IT professionals with a desire and vision to create world class IT solutions. Our aim is to treat our customers as an extension of our team rather than separately. Together we believe we will make the paradigm shift of making our stakeholders enjoy working with our solutions.

eMerge team focuses on the existing constrains and bottle necks of clients when arriving at solutions, unlike "generic" software which are commonly available and would be a short term solution. We believe our clients must benefit and must have a definite value addition when they invest with us. The most important aspect we consider is tailoring to the needs of a customer as well as reducing the response time in troubleshooting.

Therefore our concept is to provide products that are user friendly and to deliver according to customer's objectives, providing a positive impact on the P&L.

Our satisfied customer base includes suppliers of diverse products and services. Pharmaceuticals, FMCG, cosmetics, education, accounting & finance are some of the industries we cater for.

We also provide web based import solutions and mobile solutions accessible to any client for a trial period.

Our key achievement is the Sales Force Automation (SFA) software which uses the latest technology and is presently used by several companies in pharmaceuticals and FMCG.

Our services include software solutions, integrated business management through IT, web development, enterprise resource planning solutions (ERP), ios and android solutions. We have the experience and expertise to provide services to even the most complicated business processes. Our young, efficient and experienced team is the greatest resource who are dedicated to provide high-end solutions to our clients.

Microsoft, Google, Facebook, ... and ours,
the next IT Revolution

Languages, Technologies & Tools

eMerge has extensive experience with a wide variety of languages, platforms and tools. Our teams use Microsoft technologies and Open Source technologies to develop complex enterprise web solutions, iOS and Android Platform for mobile enterprise and other applications. We also have gained expertise to provide Cloud and SaaS solutions with our partners.

Our Culture

Our self-organized, empowered teams are motivated, customer focused, ownership driven and agile. They focus on collaborative engagement, considering value and innovation in every aspect that they deal with.

Our open culture is our greatest pride – employees are encouraged to be 'leaders without titles' and they in turn assume great responsibilities and have shown tremendous results.

Our success is primarily because of our focus, competent people, good teamwork, close collaboration, and transparent and friendly environment that empower the culture of openness. This is all enabled by a vibrant and innovative young workforce who ensure that we deliver excellence and value on every front, when dealing with our numerous stakeholders.
